RE-CALIBRATION

Smart Probe offer a wide range of alarms & alerts to ensure no matter what is going on, you will be alerted if something needs changing, checking or fixing, eliminating human error, forgetfulness or oversights. Logging is in real time so you can relax and get on with the task at hand knowing that Smart Probe will alert you instantly if any incidents occur preventing loss of valuable stock.

EASY TO USE

Just plug it in, turn it on, set your temperature parameters, name the locations of your data loggers, then you are ready to go. It's that simple! Our installation team will even set this up for you.

Smart phone App – Check your temperatures on the go

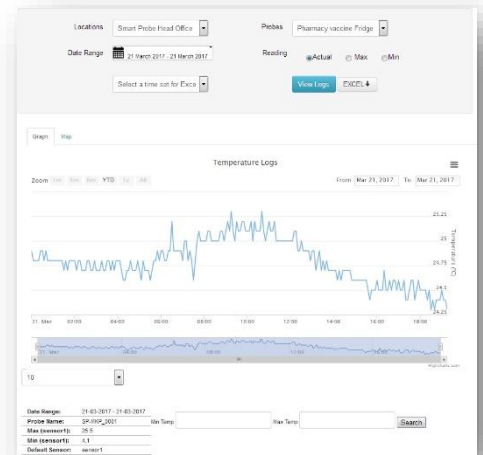

ADVANCED GRAPHING CAPABILITIES

With advanced graph capabilities including, zoom in, specific date/temp ranges to check critical temperature variations.

All data is automatically graphed – print & email ready.

Generate PDF reports on-demand, share graphs & log charts at the touch of a button in PDF, JPEG, PNG & excel formats

ACCREDITATION STANDARDS

Our advanced features make it simple to meet accreditation standards in both Hospitality & Medical Cold Chain Industries without manual paperwork.

Meet Accreditation Standards as outlined in the National Vaccine Storage Guidelines - Strive for 5

Meet Accreditation Standards for HACCP & NSW Food Authority

TEMPERATURE CHECK COMPLIANCE LOG TAB – replaces manual temperature logs

- ✓ Email & print ready log reports
- ✓ Current/min/max temperatures
- ✓ Time checked
- ✓ Persons name who checked
- ✓ Incident report form

View only login- for compliance checks by authorised auditors. The incident report form allows you to log notes for any breach of temperature range showing due diligence – be it restocking of fridge, fridge breakdown, power outage or door left open – log it here.

CALIBRATION

Each logger comes with a NATA traceable calibration certificate.

We offer onsite re-calibration to our customers
