

## LogTag Analyser Software

LogTag Analyser™ software provides an easy to use powerful platform for configuring LogTag before deployment and for data analysis when data is retrieved.

### Features include:-

- Automatic download of data when a new LogTag is inserted into an interface.
- Supports multiple interfaces thereby allow multiple downloads and batch configuring of LogTags.
- Display & printing of data in Chart, list or summary form.
- Saving downloaded LogTag data to file, retrieving previously filed LogTag data for review and email forwarding of data.
- Support for *Digital Signatures* specifically in compliance to FDA 21 CFR Part 11.

For further detail please consult the [LogTag Analyser User Guide](#).

For guidance resolving USB interface installation issues please see [Resolving USB installation issues](#).
